Appendix II

Bibliography of Earlier Papers on Light Scattering.

RAMAN C. V.  
On the Doppler effect in the molecular scattering of radiation.  

...  
On the scattering of light in the refractive media of the eye.  
Phil. Mag., 37, 568 (1919).

...  
On smoky quartz.  

...  
On a method of improving the visibility of distant objects.  

...  
On the colour of the sea.  

...  
On the molecular scattering of light in liquids and solids.  

RAY B. B.  
Scattering of light by sulphur suspension.  

RAMAN C. V. AND RAY B. B.  
On the transmission colours of sulphur suspensions.  

RAMAN C. V.  
Optical observation of the thermal agitation of the atoms in crystals.  

...  
Anisotropy of molecules.  
Nature, 109, 75 (1922).

...  
Molecular structure of amorphous solids.  

...  
Essay on the molecular diffraction of light.  
Calcutta University Press, February, 1922.

...  
Molecular anisotropy in liquids.  

...  
Opalescence phenomena in liquid mixtures.  

...  
Transparency of liquids and the colour of the sea.  

...  
On the molecular scattering of light in water and the colour of the sea.  

RAMANATHAN K. B.  
On the molecular scattering of light in vapours and in liquids and its relation to the opalescence observed in the critical state.  
of light in fluids. Sci., 8, 2 (1926).

and the theory of coronas, glories and Sci., 8, 23 (1926). 
iridescent clouds.

On the molecular scattering of light in Phil. Mag., 48, 113 
dense vapours and gases. (1928).

On the molecular scattering of light in Phil. Mag., 48, 213 
liquid mixtures. (1928).

Ramanathan K. R. and On the molecular scattering and extinction Phil. Mag., 45, 626 
Rao K. S. of light in liquids and the determination of the Avagadro constant. (1928).

On the polarization of the light scattered Phil. Mag., 46, 626 
by gases and vapours. (1928).

Ramanathan K. R. On the colour of the sea. Phil. Mag., 46, 543 
(1928).

colour of the ice in glaciers.

molecules.

surfaces.

(1928).

J. C. mixtures.

BIBLIOGRAPHY OF EARLIER PAPERS ON LIGHT SCATTERING

Surn K.
Scattering of light by smoky quartz.

Bhattacharyya D.K.
A study of the critical opalescence of carbon dioxide.

Kamesvara Ray J. C.
The opalescence of binary liquid mixtures.

Raman C. V.
The structure of molecules in relation to their optical anisotropy.

Ganesan A. S.
Oblique scattering of light in gases and liquids.

Ramdas L. A.
The scattering of light by solid surfaces.

Ganesan A. S.
On the polarisation of light scattered by organic vapours.
Phil. Mag., 49, 1216 (1925).

Krishnan K. S.
On the molecular scattering of light in organic liquids.
Phil. Mag., 50, 697 (1926).

Ramanathan K. R.
The structure of benzene and cyclo-hexane and their optical anisotropy.

Raman C. V. and Ramdas L. A.
The scattering of light by liquid boundaries and its relation to surface tension. Part I.

Ramanathan K. R.
Transparency and colour of the sea.

Banerji D.
Scattering of light in mixtures of air and CO₂.

Ramanathan K. R. and Shrinivasan N. G.
The polarisation of light scattered by some organic vapours.

Krishnan K. S.
A discussion of the available data on light scattering in fluids.

Ramdas L. A.
The scattering of light by sputtered metallic surfaces.

Krishnan K. S.
Are gaseous molecules oriented in a magnetic field?

SOGANTI C. M. On the optical properties of chromatic emulsions. Phil. Mag., 1, 321 (1926).

... The scattering of light by liquid surfaces. Ind. J. Phys., 1, 199 (1927).

SOGANTI C. M. X-ray diffraction in liquids. Ind. J. Phys., 1, 337 (1927)
